I. Introduction 1
II. Acknowledgements 1
III. Historical Reveiw of the Geology of the Sendai Area 2

Part. I.

Stratigraphy of the Cenozoic Plant Beds in the Sendai Area

I. Geology of Sendai Area 7
(I) Foundation of the Tertiary 7
(II) The Tertiary Sediments 7
A. Natori Group 7
(1) Takadate Andesite 8
(2) Moniwa Formation 8
Flora of the Moniwa Formation in the Tsukinoki and Shiogama Area 9
(a) Tsukinoki Area 9
(b) Shiogama Area 13
(3) Hatatate Formation 14
(4) Tsunaki Formation 17
B. Akyu Group 17
(1) Yumoto Formation 17
(2) Shirasawa Formation 18
(a) Shirasaka-toge Shale and Baba Tuff 18
Flora of the Shirasawa Formation in the Akyu, Shimokura and Fukuoka Area 19
(b) Itaoroshi-toge Shale 21
Flora of the Shirasawa Formation in the Okubushi Area 21
C. Sendai Group 22
(A) Lower Sendai Group 23
(1) Mitaki Andesite 23
(2) Kameoka Formation 23
(3) Tatsunokuchi Formation 24
(B) Upper Sendai Group 27
(4) Kitayama Formation 27
(5) Hirosegawa Tuff 28
(6) Yagiyama Formation 28
(7) Dainenji Formation 30

(III) The Quaternary Sediments 31
(1) Aobayama Formation 31
Flora in the Enda Area 31
(2) Terrace 35
II. Floral Composition and Characteristics 35
(1) Tsukinoki Flora 36
(2) Shiogama Flora 38
(3) Nenoshiroishi Flora 40
(4) Sendai Flora 43
(5) Enda Flora 45
(A) Impressions 45
(B) Fossil Woods 46
(C) Pollen Analysis 46
(D) Fossil Diatoms 48
III. Paleoclimatology and Geological Age 48
(1) Tsukinoki Flora 48
(2) Shiogama Flora 49
(3) Nenoshiroishi Flora 49
(4) Sendai Flora 50
(5) Enda Flora 51
IV. Summary 53

Part. II.

Geology and Qualitative Characteristics of Lignite of Sendai Area

I. General 55
II. The Qualitative Characteristics of Lignite in Each Formation 55
(1) Lignite of the Tsukinoki Formation 55
(2) Lignite of the Shirasawa Formation 58
(3) Lignite of the Kameoka Formation 61
(4) Lignite of the Kitayama Formation 62
(5) Lignite of the Yagiyama Formation 64
(6) Lignite of the Dainenji Formation 64
III. Comparision of the Qualitaive Characteristics of Lignite in the Different Field 65
Literature of Part I and II 66

Part. III.

Description of Important and Characteristic Species 77

Gymnospermae
Coniferae
Taxodiaceae
Glyptostrobus europaeus HEER 79
Angiospermae
Dicotyledoneae-Archichlamydeae
Myricaceae
Comptoniphyllum Naumanni NATHORST 80
Juglandaceae
Pterocarya rhoifolia SIEBOLD et ZUCCARINI 82
Juglans cinerea LINNAEUS 83
Betulaceae
Carpinus carpinoides MAKINO 85
Carpinus erosa BLUME 86
Carpinus laxiflora BLUME 86
Carpinus Tschonoskii MAXIMOWICZ 87
Betula Maximowicziana REGEL 89
Fagaceae
Fagus crenata BLUME 90
Fagus palaeocrenata OKUTSU n. sp. 92
Ulmaceae
Celtis occidentalis LINNAEUS 94
Magnoliaceae
Liriodendron honsyuensis ENDO 95
Lauraceae
Sassafras Oishii OKUTSU 96
Sassafras Yabei ENDO et OKUTSU 97
Hamamelidaceae
Liquidambar formosana HANCE 98
Rosaceae
Prunus Ssiori SCHMIDT 100
Aquifoliaceae
Ilex cornuta LINDLEY et PAXTON 101
Aceraceae
Acer pictum THUNBERG 103
Sabiaceae
Meliosma myriantha SIEBOLD et ZUCCARINI 105

Tiliaceae
Tilia distans NATHORST 105
Theaceae
Stewartia pseudo-Camellia MAXIMOWICZ 107
Hydrocaryaceae
Trapa natans LINNAEUS var. *incisa* MAKINO 108
Trapa natans LINNAEUS var. *bispinosa* MAKINO 109
Trapa natans LINNAEUS var. *quadrispinosa* MAKINO 110
Araliaceae
Kalopanax ricinifolius MIQUEL 110
Dicotyledoneae-Matachlamydeae
Caprifoliaceae
Viburnum furcatum BLUME 111
Reference of Part III 112
